

# Instruction Manual

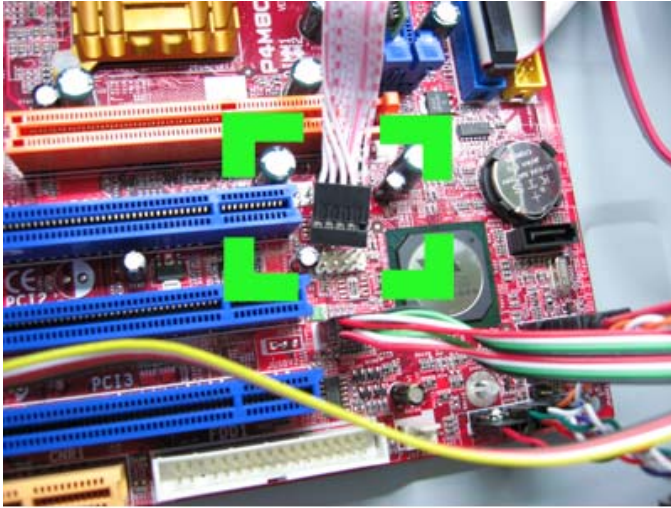

Xtatix MediaMate (XCA-MM3)  
Internal Flash Media Reader with SATA Port

1. The MediaMate (XCA-MM3) fits into the 3.5 inch bus slot of a desktop computer.
  - a. Feed the cables of the XCA-MM3 into the computer. Don't push the XCA-MM3 out from inside the computer.

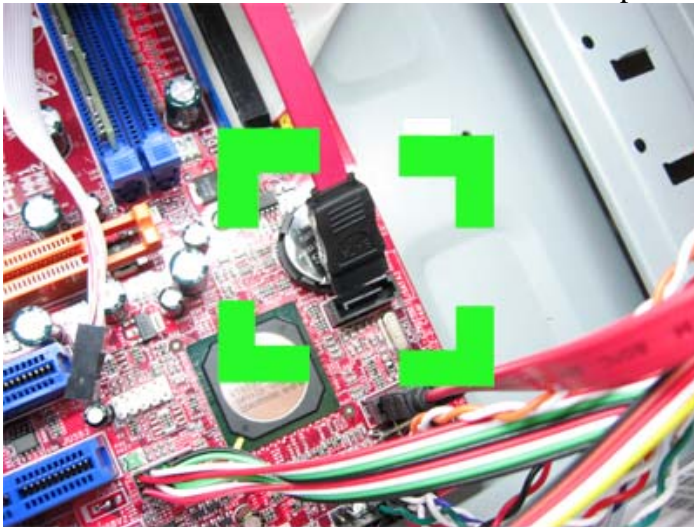

Slide the XCA-MM3 into computer

2. The XCA-MM3 has two wires that connect to ports located on the computer's motherboard.
  - a. One wire connects to the 4-Pin port on the motherboard. This wire connects the card reader and USB port.

4-Pin Plug  
on Motherboard

- b. The other wire connects to the SATA port on the motherboard.

SATA Interface  
on Motherboard

3. After these wires are connected and the XCA-MM3 is secured in its bay slot you can start using it by just plugging in flash media cards, usb devices/drives, or SATA hard drives. This device is plug n' play (WinXP) so nothing else is required to make it work.
